

May 1, 2026

To everyone in charge of the Group,
Unit Manager,
The Representatives of the Consolidated Companies,
(CC) Employees of the Consolidated Companies

Air Water Inc.

General Manager, Accounting Office

Seiji Mori,

**[Important] Request for Thorough Verification Using External Supporting Documents
in the Self-Assessment of Financial Closing**

Thank you very much for your continued cooperation.

We also sincerely appreciate your efforts in responding to the self-assessment procedures related to the financial closing under a tight schedule.

As you are aware, our Group is currently in a situation where material weaknesses in internal control have been identified in the course of internal control evaluations. Accordingly, in conducting the self-assessment of financial closing procedures at the Group level, it is essential not only to perform procedures in a formal manner, but also to strictly ensure their effectiveness and the sufficiency of audit evidence.

In particular, with respect to reconciliation and verification procedures for each account and transaction against supporting documents, completing procedures solely by checking internal documents, such as system-generated reports or internally prepared materials, is **not permitted in principle**.

Please ensure that verification is conducted using external supporting documents with higher evidentiary value, **namely documents issued by external parties**, as outlined below.

[Revenue]

- Contracts and purchase orders with customers
- Delivery notes, job completion reports, copies of inspection/acceptance records, shipping documents, etc.
- Return requests or defect reports issued by customers
- Minutes of meetings, email correspondence, or other communications with customers
- Reissued invoices, etc.

[Purchases]

- Contracts and purchase orders with suppliers
- Invoices issued by suppliers
- Delivery notes, inspection/acceptance records, etc.
- Official quotations issued by suppliers (for fixed assets)

[Fixed Assets / Disposals]

- Disposal request forms
- Disposal certificates, disposal lists, or other documents that externally substantiate the fact of disposal

[Expenses]

- Receipts and invoices issued by external parties
- Statements issued by credit card companies
- Contracts, quotations, and other documents with external vendors

Each company is requested to re-examine the content of reconciliation and verification procedures in the self-assessment, and to carefully confirm whether any procedures have been completed solely based on internal documents and whether verification using external supporting documents has been sufficiently performed.

If any items are found to have been completed only through the review of internal documents, please conduct verification again using appropriate external supporting documents, and reflect the results accordingly in the self-assessment outcomes.

We sincerely apologize for the additional burden this may place on you. However, from the standpoint of improving internal control and ensuring the reliability of the Group as a whole, we kindly ask for your understanding and cooperation in this matter.

Please also note that the Company and/or the Subsidiary Support Team may review the status of your responses as necessary. In addition, if confirmation is requested by the Company or the Subsidiary Support Team, please ensure that the relevant external supporting documents can be promptly submitted, and therefore organize and prepare the required documents in advance.
